Inlet Connections

1/2" BSP

Deva™ by METHVEN

Please read all of the instructions before installation.

General

Methven recommends this product is installed by a competent person in compliance with all relevant regional regulations.

It is recommended that inlet pressures are as balanced as possible to provide optimum performance from your product.

Before commencing installation, ensure the the system has been flushed to remove any debris which can damage the product.

Always turn off or isolate the water supply before commencing installation.

After installation all connections must be checked for leaks.

All outlets used primarily for personal hygiene shall deliver water at a safe temperature as per regional regulations.

It is the responsibility of the installer to ensure a waterproof seal is achieved.

Tap Installation Instructions

1) Fit the rubber O-ring washer (13) into the recess in the bottom of the mixer tap.

2) Insert the fixing bolt (14) into the bottom of the tap, with the slot facing out and using a flat bladed screwdriver tighten these up.

3) Screw the flexible tails (15) into the bottom of the tap, by hand, until tight. Do not use PTFE tape, or similar, on the threads.

4) Feed the tails and fixing bolt into the hole in the basin, ensuring that rubber washer is seated correctly and fully covering the hole.

5) From the underside of the basin feed the rubber horseshoe shaped washer over the fixing bolts followed by the metal one. Place the nuts over the fixing bolts and tighten until the tap is fixed on the basin. Do not over-tighten.

6) Connect the hot and cold feeds to the water supply.

7) Reinstall the water supply and test for leaks.
