Contemporary Italian Design

**Sonnato is proud to present
its prestigious blend of
high performance and stylish
Italian designed handles.**

Sonnato[®] 
Open With Elegance

Sonnato[®]

Contemporary Italian Design

Our designs are brought to life by highly skilled craftsmen and engineers. Strict quality control measures are exercised at every stage, from die casting and machining to polishing and flux coating.

Each of our products undergo specialist lacquer treatments, to provide a high resistance to shocks and abrasion and to help maintain their natural shine long into the future.

EURO SNAP CYLINDER

BWS

EURO SNAP CYLINDER

INCREASES SECURITY

Features & Benefits

Break-ins involving doors with Euro profile cylinders are on the increase in both domestic and commercial premises.

The Euro Snap Cylinder is designed to snap at the designated cut, instead of at the locking position.

This makes an attack more difficult, but always allows keyholders to open the door.

THE PROBLEM **X**

EURO CYLINDER WITHOUT SNAP SAFE

The cylinder snaps in two halves, leaving the locking mechanism exposed to intruders.

THE SOLUTION **✓**

DESIGNED LOCK CYLINDER WITH SNAP SAFE

The cylinder snaps at the Snap Safe line leaving the locking mechanism intact.

Find your size

Measuring for ordering: Measure the distance between the two keyholes (A) and the distance from the keyhole to the edge of the door (B).

Fire Rated
FD 30

CP Range - Combination

A heavy-duty range of recodable combination padlocks

Unique in design, our combination locks are manufactured to the highest standards for quality performance. Easy to use, they are fully recodable and a number of locks can be coded alike so that one code opens several locks. Many of our locks are patented and have individual design features to improve performance and security.

Rapier® StarDeck

Exterior Decking Screw

- ▶ **No Pre-drilling**
- ▶ **Superior Holding Power**
- ▶ **50% Less Drive-in Torque Required**
- ▶ **Exceptional Corrosion Resistance**

Extreme Performance

The award winning *StarDeck* is probably the most efficient weather resistant, exterior screw available. The patented StarForm™ thread provides up to 50% lower drive-in torque, enabling quicker assembly times with exceptional holding power – all without pre-drilling!

With a StarDrive™ recess, partial thread and sizes from 50mm to 100mm long, the *StarDeck* is the ultimate fixing for all exterior timber.

Long Life – No Staining

High tech StarCoat™ protection extends corrosion resistance in the toughest environments, including ACQ (alkaline copper quaternary) and other treated timber.

Quick Start

Sharp point for a quick start, rapidly penetrating into all wood types, including hardwood, treated softwood or wood composites.

Safe

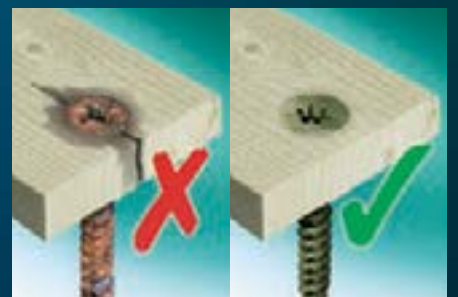

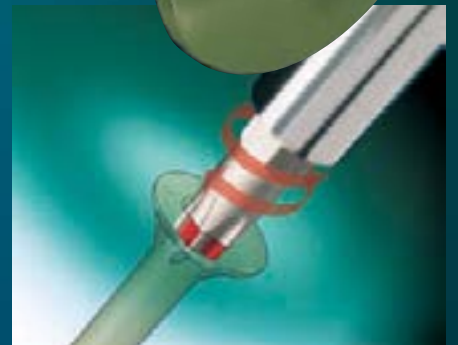

The precision StarDrive™ recess improves grip when using power tools and drives into even the hardest wood, without mechanical damage.

No Splitting

The patented StarForm™ thread lowers torque and reduces wood splitting.

Flush Finish

The ribbed countersunk bugle head sinks into all timber ensuring a flush finish – effortlessly.

www.rapierstar.com

Rapier® StarDeck Exterior Decking Screw Product Information

The **StarDeck** decking screw is fast starting and cuts a receiving thread into timber rather than simply displacing material, virtually eliminating the risk of splitting – even close to the edges of the timber

There is no need to pre-drill, even into hardwood and the deep star drive recess provides a positive engagement with the screwdriver bit, reducing the possibility of mechanical damage to the coating. The partial thread increases pull-in power between the timbers making a tighter fit and reducing 'Jacking', where a full threaded screw tends to pull apart the jointed material.

StarDeck decking screws have triple layer corrosion protection. A high performance ceramic top coating is applied giving **StarDeck** excellent corrosion resistance, exceeding 500 hours when salt spray tested in accordance with ISO 9227:2012.

The small bugle head along with under head ribs are designed to present minimal appearance in the finished product. Semi-matt green finish also blends with treated timber, providing a neat, flush and unobtrusive finish.

Rapier® StarFix

Masonry Fixing

- ▶ **No Plug Required**
- ▶ **High Strength Stress Free**
- ▶ **50% Quicker Assembly**
- ▶ **30% Less Drive-in Torque Required**

High Tech Fixing

The award winning **StarFix** masonry fixing screw that threads directly into pre-drilled pilot holes - no anchor or plug is needed. Patented StarForm™ self tapping thread with spaced hi-lo thread form provides ultimate grip and allows for multiple re-fixing without stripping the formed tapped hole.

- ▶ No plug required – Cost effective and simple
- ▶ Only 6mm or 6.5mm pilot hole required through frame, reinforcement and brickwork
- ▶ Universal for all common applications
- ▶ Long lasting and stress free stand-off fixing

Safe

The precision StarDrive T30 recess provides optimum drive efficiency, improving grip and extending bit life.

Secure

High thread cuts into masonry whilst the low thread compacts loose material. This gives better resistance to the fixing pulling out of the masonry base due to more effective thread engagement.

Faster & No Wastage

No need for a plug means a quicker application. **StarFix** masonry anchors eliminate the wastage associated with nylon installation fixings.

www.rapierstar.com

Lower Torque

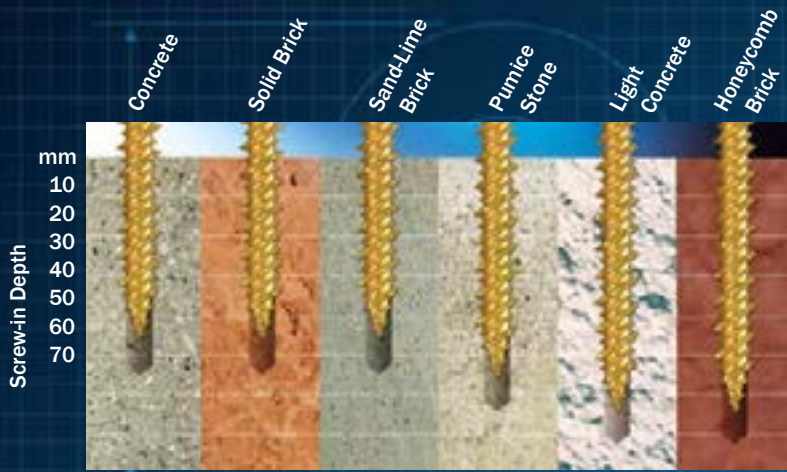

The highly efficient StarForm™ thread lowers torque and achieves optimum insertion into all kinds of brick, stone, concrete and wood.

Extensive Range

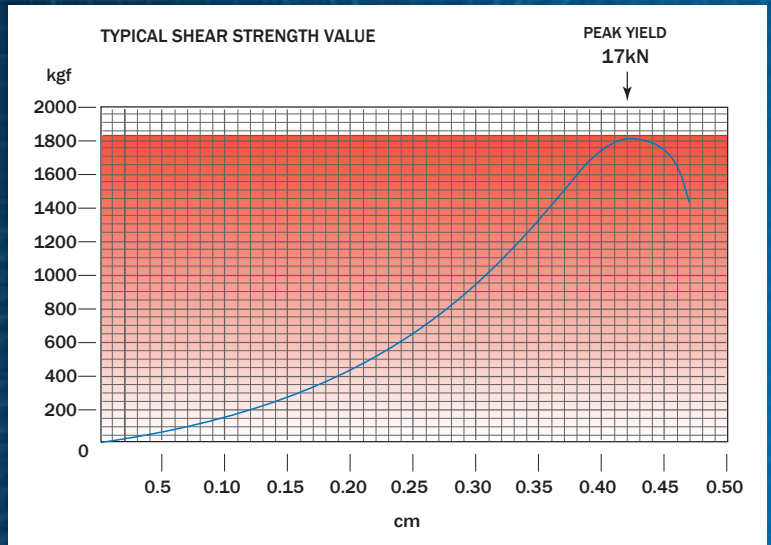

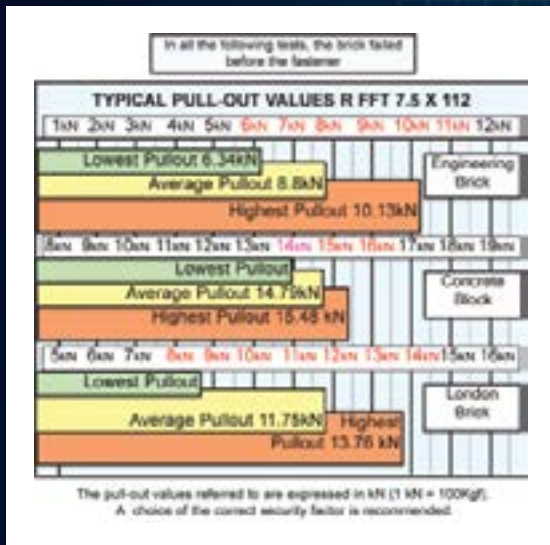

Nine size variations from 62mm to 202mm ensure there is a StarFix masonry anchor available for all applications.

Safe and Strong

Safer, stronger installations with a 7.5mm diameter steel fixing.

Suggested minimum screw-in depths

* Average pull out figures are typical values and ultimate pull out will be dependant on the condition of the material. It is recommended that any user establish the nature and condition of any substrate prior to usage.
